DENTAL

REVISION

CO-ORDINATOR

I'm Jaye, I'm a nutritionist, health advocate and dental industry worker, passionate about the potential for some simple biological tweaks in conventional dentistry to provide a new baseline for health recovery and disease prevention.

With over 30 years experience working with dentists and patients, (15 of those years working with biological dentists) combined with training and lived experience of the benefits of dental toxin removal, I'm here to support my clients and their engaged health professionals through what can be a difficult, confusing, overwhelming and expensive process: the finding out about dental toxins, the frustration of finding appropriate treatment and the not knowing if their treatment is aligned as required. (These concerns often live in the catalytic presence of chronic or advanced health problems.)

I work with my clients, their dentist (or any general dentist willing to work within the client's requested parameters) and my clients' primary health care practitioner (if any) to facilitate clear, actionable processes and satisfactory outcomes for all parties involved in the dental revision process.

MY ROLE: BIOLOGICAL DENTAL CARE COORDINATOR AND CLIENT ADVOCATE

I SERVE TO: facilitate collaboration between my client/s, their existing dentist (or any general dentist willing to work within client's terms), consultant biological dentist/s, and clients' primary medical/naturopathic practitioner/s.

MY FUNCTION IS TO: facilitate 'biological' dental treatment for my client (according to HUGGINS/ IAOMT and other standards) and to bridge any gaps between conventional dentistry and biological dental/systemic health approaches for both client and their chosen health professionals.

MY APPROACH IS TO: Beginning with clarity of understanding between all parties, I facilitate and safeguard respectful, co-ordinated dental revision to IAOMT/HUGGINS standard for my client, honoring and respecting the historical, cultural and ideological context of conventional dental practice and the scope of general dental practitioners.

Core Provisions:

- Client support through complex treatment decisions (within my scope)
- Quality assurance, client treatment monitoring and reporting
- Coordination of multi-practitioner care teams
- respectful advocacy with conventional dentists
- hands-on assistance during dental procedures (Optional)

DENTAL DETOX PROTOCOL BREAKDOWN

Component	Description	Fee
STEP 1 Options		
Dental Revision Assessment	90-minute comprehensive health history review, dental history, goals clarification, review of current dental records if available.	\$350
Treatment plan, Info Dossier	Referral facilitation, sharing of records, Consulting Dentist fee, Review treatment plan, patient education, questions/concerns, tailored information booklet for Client education	\$350
STEP 2 Options		
Dental Practitioner co-ordination	Preparation of biological dentistry proposal, respectful communication and advocacy with client's existing dentist or any general dentist of clients choice. Confirmation of protocol	\$350
Appointment Cascade	Pre-treatment discussion and clarification with client and primary practitioner of expected treatment process, and any systemic/psychological/biological treatment preparation required. Post treatment short Followup and handover.	\$350
STEP 3 Options		
Supply Revision kit	Supply dentist with any items additional to their surgery supply needed to complete a surgical or filling dental revision.	\$350
Chair-side Assistance	Attendance at dental appointments to provide advocacy, note-taking, comfort support, communication bridge and any extra diagnostic and procedural tools to dental practitioner. (TRAVEL COSTS NOT INCLUDED)	Variable (\$200-400 per visit)

SINGULAR OPTIONS

Component	Description	Fee
Practitioner Liaison	Coordination call with patient's primary practitioner or dentist, alignment on systemic support protocols and overview of dental detox process.	\$90 per call
Chair-side Assistance	Attendance at dental appointments to provide advocacy, note-taking, comfort support, communication bridge and any extra diagnostic and procedural tools to dental practitioner. (TRAVEL COSTS NOT INCLUDED)	Variable (estimated \$200-300 per visit)
Expert second opinion	Develop a second opinion on any current proposed dental work.	\$250

ROLE CLARIFICATION & RESPONSIBILITIES

MY RESPONSIBILITIES

As Coordinator:

- Serve as primary communication hub between all parties
- Translate biological dentistry concepts for conventional dentists (with tact and respect)
- Ensure all practitioners have necessary information and are aligned on approach
- Advocate for patient preferences and concerns
- Maintain comprehensive records and documentation
- Track timelines and ensure follow-through on recommendations

As Patient Advocate:

- Educate patient on biological dentistry principles and options
- Help patient formulate questions and concerns for dental team
- Support informed consent process
- Monitor patient experience and satisfaction
- Identify and escalate issues promptly

As Procedural Assistant (if engaged):

- Provide clinical support during dental procedures
- Document treatment details for patient records
- Facilitate real-time communication between patient and dentist
- Monitor patient comfort and stress levels
- Ensure biological protocols are followed (e.g., suction, rubber dam, oxygen support)

As Reporting Agent:

- Provide written summaries to all practitioners after key milestones
- Document treatment outcomes and patient responses
- Maintain timeline records

PATIENT ACCOUNTABILITY

- Assumes final authority on all treatment pertaining to their own body
 - Provide complete and accurate health and dental history
 - Sign necessary releases for record sharing between practitioners
 - Attend scheduled appointments or provide adequate notice for changes
 - Follow agreed-upon protocols (supplements, pre/post-care instructions)
 - Communicate openly about symptoms, concerns, and preferences
 - Pay fees according to agreed schedule
 - Maintain direct relationships with all practitioners (I facilitate, **I don't replace**)
-

GENERAL DENTIST ACCOUNTABILITY

- Respect patient autonomy in treatment decisions
 - Provide complete dental records (X-rays, charts, treatment history)
 - Ensure biological protocols are followed in line with Australian and IAOMAT and other standards e.g; adequate client ventilation, rubber dam use, electrical gradient removal, periodontal ligament removal etc.
 - Maintain open communication regarding concerns or limitations
-

CONSULTANT DENTIST ACCOUNTABILITY

- Provide biological dentistry expertise
 - Communicate clearly on risks, benefits, and alternatives
 - Coordinate with patient's existing dentist when shared care is appropriate
 - Provide a detailed treatment plan with options
-

PRIMARY PRACTITIONER ACCOUNTABILITY

- Provide relevant systemic health history and current protocols
- Recommend pre/post-dental support supplements and treatments if appropriate
- Monitor patient systemic response to dental treatment.
- Collaborate with Facilitator on detoxification protocols if appropriate
- Communicate any contraindications or concerns

PRICING JUSTIFICATION & VALUE

- specialised knowledge (biological dentistry coordination requires understanding of both conventional and biological approaches, mercury safety, root canal and cavitation surgery, bio-compatible materials, and systemic health connections)
 - time investment (each case requires 10-20 hours of coordination, communication, and documentation)
 - liability and responsibility (I assume accountability for communication failures and coordination gaps)
 - tact and diplomacy (to successfully navigate potential conflicting ideologies in dentist/patient relationships)
 - patient outcomes (co-ordinated care produces better results, fewer complications, and higher satisfaction)
-

LIMITATIONS & SCOPE

I Do NOT:

- Provide dental or medical diagnosis or treatment
- Replace the dentist-patient or primary practitioner-patient relationship
- Guarantee specific outcomes
- Override clinical decisions made by licensed practitioners
- Provide legal or insurance advice

I DO:

- Facilitate communication and coordination
 - Educate and advocate
 - Support informed decision-making
 - Ensure protocols are followed, document and report
-

PAYMENT TERMS:

- 50% deposit to initiate services
- Balance due at treatment completion (Chairside assistance fees due day of service)
- Cancelled appointments with less than 24 hours notice: 50% fee
